Project Design Phase-I
Proposed Solution Template

Date	24 September 2022
Team ID	PNT2022TMID47959
Project Name	Project – NEWS TRACKER APPLICATION

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Jack is a business who needs to get the information about news because he interested to know current affairs and want to update himself.
2.	Idea / Solution description	To create a cloud application to get the information about the News.
3.	Novelty / Uniqueness	Project novelty to create the news tracker application for people for who want to update himself . The concept of information collectivity is being progressively more used but there is few of application that to have their source customized news websites to have their source customized and integrated into the single app that will be used by people. With the use of IBM technologies, we are able to create a scalable solution for news integration. While building a single app that will contain all the News sources and will be used by the users.
4.	Social Impact / Customer Satisfaction	The social impact if the application is to reach than real news information about the society. Then, avoid the fake News spreading by this application.
5.	Business Model (Revenue Model)	The business model of the application for the people who require the information about the society and variety of informations that connects the all users in the application.
6.	Scalability of the Solution	Application performance is measured in terms of its ability to scale up or scale down the nuumber of users requests or other such performaance measure attributes
